

ASSIGNMENT 1: Automating the boring stuff.

Part 1:

Write a python program to print your name 5 times.

Hint use the print() function.

Part 2:

Once and only once you can print your name five times proceed.
If you want to run a python command multiple times you can use.
something called a loop

```
for _ in range(3):  
    print("YOur name")
```

This is called a for loop. The number you put in range tells python how many times to run that command. Change the example code to make python print your name 5 time
